

HydroZone 3[®]

The Ultimate Pool Experience

SRK has developed and perfected a water process with astounding results for water quality and health benefits — the HydroZone 3™ system.

HydroZone 3 is a remarkable water experience that quiets your mind and soothes your soul. The meditative effect of our water instills a deep sense of peace, rejuvenation, and balance — improving the health and well-being of individuals experiencing HydroZone 3 water.

Our water is as soft and fresh as an artisanal spring, causing no harm to skin and hair. The absence of chlorine creates an overwhelmingly relaxing experience.

Quick Facts

- Reduces chlorine consumption by 95%
- Prevents and kills algae blooms
- Maintains water balance: minimal chlorine and ozone/UV technologies don't impact mineral balance or produce pH bounce
- Proven effective in killing *Cryptosporidium*, hazardous parasites that are increasingly resistant to chlorine-only treatments
- Responds to water conditions in real time. Filters and balances environmental factors such as rain and runoff contamination

SRK

A Closer Look

Our water is as beautiful as it is safe. Leveraging SMART pool technologies, HydroZone 3 gives you a remarkably healthy and rejuvenating water experience. No maintenance. No reactive chemicals. No draining and refilling. Just perfect water.

The HydroZone 3 system uses three interconnected methods of water purification: ozone, UV technology, and a minimal amount of chlorine. Each works in tandem with the next to instantly respond to water conditions — filtering, oxidizing, sanitizing, and balancing water as soon as bacteria are introduced.

Ozone Treatment

Oxidizes water, fights bacteria, removes the smell of chlorine, and kills *Cryptosporidium*.

UV Treatment

Enhances ozone process and increases its ability to kill pathogens, viruses, and *Cryptosporidium*.

Chlorine Treatment

Trace amounts protect water against bather-to-bather contamination.
